Information about the assessment of students taking the course
NDAK14004U Web Science (WS) in **Block 3, 2020**

The final grade of the course will be based on an overall assessment of two components: (1) an oral presentation and (b) a written report. Each component is explained next.

Oral Presentation. Throughout the course students will be working on a project. In week 13, each student must present their project orally to the instructors of the course in a closed session (the only people present in the room will be the student presenting and the instructors). The presentations are individual. The presentation will last 10 minutes, followed by 10 minutes of questions from the instructors about their project. The actual date, time and location of each presentation will be announced on Absalon by week 12. We will primarily schedule presentations during Schedule Group B2 (Tuesday 13-17, Friday 10-12) to avoid conflicts with other courses.

Written Report. In week 14, students must submit a written report describing their project. The report is an individual hand-in. The deadline for submitting the written report is Thursday 2 April 2020, 12h00. The format, length, and form of submission of the report will be announced on Absalon by week 12.

Extensions. If a student does not show up for the oral presentation at the reserved time or does not submit the report by the deadline, the student automatically fails the course. In case of sickness, accident or similar grave and exceptional circumstances, an alternative date to hold the oral presentation and/or an extension to submit the written report can be arranged only by the course responsible (Christina Lioma, c.lioma@di.ku.dk). Any such request must be made by email and must be accompanied by evidence (e.g., doctor's note, police report).
